(54) Title: A METHOD AND SYSTEM FOR WRITING A SERVO-PATTERN ON A STORAGE MEDIUM

(57) Abstract

A technique for writing a servo-pattern on a storage medium (12a) located in a recording device (10) having an internal recording head (14a). A timing pattern is generated on the storage medium (12a) with the internal recording head (14a) and a radial positioning value is determined in order to radially position the internal recording head (14a). The servo-pattern is written using the internal recording head (14a) at locations determined by the timing pattern and the radial positioning value.
